DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: The specification need to provide the headers as required by the U.S. practice application.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) THE NAMES OF THE PARTIES TO A JOINT RESEARCH AGREEMENT.
- (e) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC.
- (f) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (g) BRIEF SUMMARY OF THE INVENTION.
- (h) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (i) DETAILED DESCRIPTION OF THE INVENTION.
- (j) CLAIM OR CLAIMS (commencing on a separate sheet).
- (k) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (l) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Appropriate correction is required.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the English language need to be provided. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Information Disclosure Statement

3. The information disclosure statement filed 10/17/2005 fails to comply with 37 CFR 1.98(a)(2), which requires a **legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed**; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.. Noted that there is no copy of references WO-9946593 and DE 19518621 in the record.

Claim Objections

4. Claims 1-9 are objected to because of the following informalities: In claim 1, line 1, "Process", should be --A process--; in claims 2-7, line 1, "Process", should be --The process--; in claim 8, line 1, "Device", should be --A device--; in claim 9, line 1, "Device", should be --The device--. Appropriate correction is required.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors. Further, in claim 1, line 3, recited "characterized in that it consists ..." is unclear on what applicant wants to claim for "it" mean. Addition, in claim 1, A process does not provide steps as the format required in the U.S practice application.

For these reasons above, the claims are unclear and indefinite.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
